INFORMATION DISCLOSURE STATEMENT

MAIL STOP PCT
Commissioner For Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Sir:

Pursuant to 37 C.F.R. §1.97, a list of documents that may be material to the examination of this application is provided on the attached Form PTO-SB08. Listed Documents A1-A24 are U.S. or foreign patents or pertinent articles that may be relevant to the examination of the present application. The publications listed thereupon generally relate to subject matter of the invention, but do not fairly teach or suggest the claimed Nucleic Acid Molecule Comprising a Nucleic Acid Sequence Coding for a Hemocyanin. Copies of the listed publications are enclosed for consideration by the Examiner.

Serial No: 10/049,988
Jürgen MARKL, et al.

(GKS 102.0)
7911/86349

Listed Documents A1-A2 and A4-A8 and A10-A24 were listed on the International Search Report by the International Searching Authority in the parent case, International Patent Application No. PCT/EP 00/08129. Documents A1, A2, A5, A12, A13, A16, A17, A18, A19, A20, and A21 were classified as "X" material to the patentability of the searched invention on the International Search Report, a copy of which is enclosed. Documents A6 and A7 are in the French language. Document A7 is the European counterpart of Document A3, according to the International Search Report, and thus provides the English language translation. An English language abstract of Document A6 is enclosed, we do not have an English translation of Document A6 at the present time, and the corresponding Australian patent application is not presently available in English.

Document A4 listed on the attached Form PTO-1449 is the published PCT application corresponding to the present U.S. patent application, for which the benefit of priority is claimed and disclosures thereof incorporated by reference. A copy of the first page of document A4 is provided herewith. A copy of the priority document is already of record.

Document A10 discloses periodate-sensitive immunological cross-reactivity between keyhole limpet haemocyanin (KLH) and serodiagnostic schistosoma mansoni egg antigens.

Document A11 discloses sequence of the octopus dofleini hemocyanin subunit: structural and evolutionary implications.

Document A12 discloses primary structure and unusual carbohydrate moiety of functional unit 2-c of keyhole limpet hemocyanin (KLH).

Document A13 discloses keyhole limpet hemocyanin Type 2 (KLH2): detection and immunolocalization of a labile functional unit *h*.

Document A14 discloses immunoelectron microscopy of hemocyanin from the keyhole limpet (*Megathura Crenulata*): a parallel subunit model.

Document A15 discloses cocaine vaccines: antibody protection against relapse in a rat model.

Document A16 discloses mass determination, subunit organization and control of oligomerization states of keyhole limpet hemocyanin (KLH).

Document A17 discloses suppression of psychoactive effects of cocaine by active immunization.

Document A18 discloses the sequence of a gastropod hemocyanin (HtH1 from *Haliotis Tuberculata*).

Document A19 discloses subunit organization of the abalone haliotis tuberculata hemocyanin type 2 (HtH2). and the cDNA sequence encoding its functional units d, e, f, g and h.

Document A20 discloses keyhole limpet hemocyanin: structural and functional characterization of two different subunits and multimers.

Document A21 discloses abalone (haliotis tuberculata) hemocyanin type 1 (HtH1) organization of the 400 kDa subunit and amino acid sequence of its functional units f, g and h.

Document A22 discloses a keyhole limpet haemocyanin (KLH): purification of intact KLH1 through selective dissociation of KLH2.

Document A23 discloses a quaternary structure, subunits and domain patterns of two discrete forms of keyhole limpet hemocyanin: KLH1 and KLH2.

Document A24 discloses complete amino-acid sequence of a functional unit from a molluscan hemocyanin (*Helix Pomatia*).

Documents for which the supplied date of publication lists the year of publication without the month were published sufficiently earlier than the effective U.S. filing date and any foreign priority date, so that the particular month of publication is not in issue. Pursuant to §609 of the MPEP, it is understood that the month of publication is not required when the particular month of publication is not in issue. Where no date is supplied, it is believed that the date of publication is not in issue.

No inferences should be drawn that the attached list represents a comprehensive investigation, or that any material disclosed is equivalent to the subject invention. In addition, none of the documents that have publication dates prior to the priority date of the above application anticipate the invention in this application.

The cited documents disclose numerous specific features. There has been no attempt to list each and every feature disclosed by each document. The Examiner is requested to review the documents and determine the extent of the materiality of the document disclosures with respect to the present invention.

Serial No: 10/049,988
Jürgen MARKL, et al.

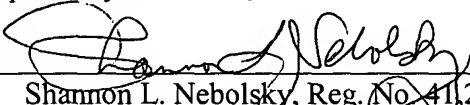

(GKS 102.0)
7911/86349

The discussion of any art and the citation of any document herein is not to be construed as an admission that the art or document disclosure is necessarily within the invention field of endeavor, that the art or document disclosure is necessarily prior in time to a particular date which may be relevant to the instant patent application, and/or that the art or document disclosure is otherwise necessarily prior art as defined by the patent law with respect to the instant invention and application.

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosure of any document or other art, including the disclosures of the art and documents recited herein, that may be cited by the Examiner in rejecting a claim in the instant patent application. The recitation herein of the art and documents is not to be construed as an assertion that more pertinent art could not possibly be in existence.

No fee or petition is believed to be necessary. However, should any fee be needed, please charge our Deposit Account No. 23-0920, and deem this paper to be the required petition.

Respectfully submitted,

By 
Shannon L. Nebolsky, Reg. No. 41,217
